

BLOCKCHAIN DEVELOPMENT

ABOUT US

We develop high-quality blockchain software, provide maintenance, and guarantee the quality of our work. Our business-oriented approach provides expertise on every stage of blockchain-powered software development along with qualitative customer service. Working with us you get more than a technical implementer - you get a technical partner who strives for your success.

Advantages of software outsourcing

The first and most significant factor in favor of outsourcing is the cost of such services. Commissioning the software development project to an external provider is always cheaper than hiring and keeping an in-house team of developers in your company, paying taxes for them, buying and updating all the required software and hardware, etc.

Secondly, outsourcing enables easy access to the global pool of developer talent; you are not limited by the number of developers available in your city or region, hiring the coder with the needed tech stack anywhere in the world.

HOW WE WORK?

CORE TEAM

ARTJOMS
JURKEVICS

CHIEF COMMERCIAL
OFFICER

We develop

Smart Contracts

Binance Smart Chain, Solana, Ethereum, EOS, TRON, and other blockchains smart contracts development/audition.

Crypto trading apps

We have professional software developers for your trading apps.

DeFi

Development of any blockchain based financial solutions, e.g. assets tokenization platforms, p2p lending, neobanks.

Mobile apps

We program and support mobile applications with extensive experience in mobile development.

Will my data be safe?

Once you decide to work with us, we sign an NDA covering all aspects of our work. So, your project will be developed by our coders and engineers with full respect to privacy and confidentiality until the moment of its launch to market.

Only after the market launch can we publish a case of working with you on our website upon your approval of that publication. Clients not wishing to publicize their projects remain confidential forever, with no details disclosed by our staff to the public or other customers.
